

ANIMAL BEHAVIOR WEBSITE

And

Will be building a website about

_____ behavior

focusing on

_____ animal.

Schedule:

Week3 During Lab: pairs and topics

Week6 During Lab:

Will come to lab prepared to build a draft of the website.

Obviously there will still be much research to be done after this but the draft will include some information for each of the topics to be cover.

Week7 Before Lab

All websites draft outlines must be posted on the courses server before lab.

This need not be much more than what was completed in class last week.

The goal is to see that all groups are able to use the software.

Week 11 Wednesday November 14st draft

All websites must be posted on the courses server by 5:00 pm.

The websites should be ready for public viewing. It is each student's responsibility to check that all images and links are functional from any computer on campus. If you have failed to create correct relational links and images they may work on your own computer but not when viewed across the web. Please seek advice before noon today for assistance.

Week 12 Wednesday November 21st critique

Students will hand in hard copy of a constructive critique for their two assigned websites.

These critiques will be returned to the webpage authors the following wednesday (or in my office earlier)

Week December 10th final draft

Final websites, incorporating the critique comments, must be posted on the courses server by 5:00 pm.

They will be linked to create a course webpage that will be available for viewing.

THIS FORM WILL BE HANDED IN BY THE END OF LAB IN WEEK 3 Sept 17 and 19.
