Qual Bibliography

My sources are a bit more scattered than I had originally planned or hoped because there does not seem to be much in the way of literature focusing specifically on my topic. As a result, my methodology has shifted to collecting from the broader literature and then attempting to extrapolate those arguments to a more general theory, I still plan on finding additional sources, because most sources make a relatively small contribution to my topic while focusing on other issues. Additional search terms used in JSTOR and WorldCat are not included because they brought up primarily articles I had already found.
